THE GUIDE TO CENTRAL PERSONNEL DATA FILE EDITS

(Update 21, 12/02)

OVERVIEW

1. General

The Central Personnel Data File (CPDF) system is an automated information system containing individual records for most Federal civilian employees. The system's principal objective is to provide a readily accessible primary data source for meeting the workforce information needs of the Office of Personnel Management (OPM), other central management agencies, the Congress, the White House, and the public. From data submitted by the agencies, OPM creates a status file and a dynamics file. The status file contains an individual record of the status of each active employee as of the end of the reporting period, usually the end of the fiscal quarters of March, June, September, and December. The dynamics file contains a record of all personnel actions occurring during a particular reporting period, usually the January-March, April-June, July-September, and October-December fiscal quarters.

The Guide shows the status file and dynamics file data edits. The CPDF edits are organized into separate sections -- one for the status file and another for the dynamics file. Edits common to both the status and dynamics files are shown in both the status and dynamics sections of the manual. Within each of these sections, individual field edits are shown before the relationship edits. While individual field edits are executed before the relationship edits, the relationship edits themselves are organized solely for ease of reference in the manual. They may be executed in any order the agency considers efficient.

Generally (unless the name of a data element has changed), the relationship edits are organized in data element name order based on the data element that is considered the subject of the edit. For example, a pay basis/pay plan edit would be shown under pay basis when pay basis is considered the subject of the edit. A pay basis/pay plan edit would be shown under pay plan when pay plan is considered the subject of the edit.

OVERVIEW

The Guide documents how the CPDF system edits agency data. The default shown for an individual field edit or a relationship edit indicates the action taken by the CPDF system when data fail the edit. Usually, the default consists of placing asterisks in the data fields to show that the submitted data are not valid. If data fail an edit in an agency system, the agency should correct the data. **AGENCIES SHOULD NOT SUBMIT ASTERISKS TO THE CPDF**.

Note that the abbreviation **GPDS** refers to The Guide to Personnel Data Standards, which is available at Internet address http://www.opm.gov/feddata/guidance.htm. The abbreviation **GPPA** refers to The Guide to Processing Personnel Actions, which is available at Internet address http://www.opm.gov/feddata/persdoc.htm.

We add, revise, and delete CPDF edits throughout the year to reflect changes in human resource programs. Whenever possible, we issue the new editing requirements in advance of their effective dates to give agencies ample time to revise their systems. We issue these revisions as Changes in the Unincorporated Changes section of this manual's Appendix. The effective date is at the beginning of each Change listed in the Appendix. Readers should always check the Unincorporated Changes section of the Appendix for any revisions in edit requirements that have occurred since the last Update.

We issue complete revisions of this manual as Updates. When we issue an Update, we incorporate all of the editing requirements effective as of the date of the Update. This date is shown at the top of each page. We list all the revisions in the Incorporated Changes section of this manual's Appendix. Thus, any change in the body of the manual from one Update to the next is listed in the Incorporated Changes section.

OVERVIEW

2. Edit Number

Each edit is assigned a six-position CPDF edit number, which is used on CPDF error listings. The edit number consists of three components: (1) a three-digit edit prefix in positions 1 through 3 that identifies the data element that is the subject of the edit, (2) a two-digit number in positions 4 through 5 that (in conjunction with the two other components) uniquely identifies the data element edit (with the numbers 00 and 01 reserved for individual field edits, as distinguished from relationship edits), and (3) a one-digit edit suffix in position 6 that identifies the edit as pertaining to the status file (number 1), to the dynamics file (number 2), or to both the status and dynamics files (number 3). Examples are shown below.

EDIT NUMBER	EXPLANATION
xxx.00.1	Indicates an individual field edit that only pertains to the status file.
xxx.00.2	Indicates an individual field edit that only pertains to the dynamics file.
xxx.00.3	Indicates an individual field edit that pertains to both the status file and the dynamics file.
xxx.05.1	Indicates a relationship edit that only pertains to the status file.
xxx.05.2	Indicates a relationship edit that only pertains to the dynamics file.
xxx.05.3	Indicates a relationship edit that pertains to both the status file and the dynamics file.

OVERVIEW

3. Edit Prefix

The edit prefix, which occupies positions 1 through 3 of the six-position CPDF edit number, identifies the data element that is the subject of the edit (as shown below). The status file individual field edits start on page B-1. The status file relationship edits start on page B-7. The dynamics file individual field edits start on page C-1. The dynamics file relationship edits start on page C-8. Using Adobe Acrobat to view the Guide, click on "SR" (appearing after the data element name) to go to the status file relationship edits for the data element. Click on "DR" (appearing after the data element name) to go to the dynamics file relationship edits for the data element.

STATUS FILE
INDIVIDUAL FIELD EDITS

Notes:

1 Spaces are valid for this data element except for the March and September submissions.

2 If the first two positions of the submitted duty station are alphabetic, zeros are inserted in the last three positions regardless of the submitted values. Note that spaces are not acceptable for a duty station on Status submissions, although spaces are acceptable for a duty station on Dynamics submissions.

3 Spaces are valid for this data element: (a) if agency/subelement is AFNG, AFZG, or ARNG or (b) if agency/subelement is CM63 and current appointment authority (1) is XZM.

4 Metropolitan statistical area (MSA) and locality pay area, two data elements generated by OPM from duty station and not submitted by agencies, also have asterisks inserted. Asterisks will also be inserted in locality adjustment.

5 Asterisks are inserted in nonblank entries for locality adjustment, retention allowance, and supervisory differential.

6 If agency/subelement is other than DJ02, and the first position of SSN is 8 or 9, then positions 2 through 5 of SSN must match an entry in the CPDF personnel office identifier file or be asterisks.

OR

If the first position of SSN is other than 8 or 9, then positions 1 through 3 of the SSN must be greater than 000 and less than 800.

Default: Asterisks are inserted in SSN.

STATUS FILE
RELATIONSHIP EDITS

005 (INSTRUCTIONAL PROGRAM)

005.02.3 If education level is greater than 12,
Then instructional program must not equal spaces.

Default: Insert asterisks in instructional program.

005.13.3 If education level is not equal to 06, 10, or a number equal to or greater than 13,
Then instructional program and year degree or certificate attained must be spaces or asterisks.

Default: Insert spaces in instructional program and year degree or certificate attained. Failing the edit does not cause the record or data elements to be counted as errors, but agency should submit spaces for the data elements.

STATUS FILE
RELATIONSHIP EDITS

060 (BARGAINING UNIT)

060.02.1 If pay plan is ES,
Then bargaining unit must be 8888 or asterisks.

Default: Insert 8888 in bargaining unit.

060.03.1 If bargaining unit is other than 6666, 7777, 8888, or asterisks,
Then the bargaining unit must be authorized for use in the agency.

Default: Retain data as submitted. Failing the edit does not cause the record or data element to be counted as an error, but agency should validate the bargaining unit code with the LAIRS (Labor Agreement and Information Retrieval System) contact.

652 (LOCALITY ADJUSTMENT)

Note: Table 25 shows locality pay percentages currently authorized for each locality pay area. We divide the locality adjustment amount by the basic pay amount to calculate the percentage used in these edits. We generate the locality pay area code from the duty station. The locality pay area codes are defined in The Guide to Personnel Data Standards, available on the Internet at http://www.opm.gov/feddata/guidance.htm.

652.10.1 If pay plan is FO, FP, GG, GH, GM, or GS,
And pay rate determinant is 0, 3, 7, J, or K,
And locality pay area is 02 through 88,
Then the amount of the locality adjustment must match any percentage for the locality pay area on Table 25, or be asterisks.

Default: Insert asterisks in locality adjustment.

652.15.1 If pay plan is GG, GH, GM, or GS,
And pay rate determinant is 5, 6, E, F, or M,
And locality pay area is 02 through 88,
Then the locality adjustment amount may not be spaces or an amount greater than the highest percentage for the locality pay area on Table 25.

Default: Insert asterisks in locality adjustment.

652.20.3 If locality pay area is 99,
And agency is other than AM, GY, IB, or ST,
Then locality adjustment must be spaces or asterisks.

Default: Insert spaces in locality adjustment. Failing the edit does not cause the record or data element to be counted as an error, but agency should submit spaces for the data element.

Then the following data elements may not be spaces:

prior basic pay
prior duty station
prior grade
prior occupation
prior pay basis
prior pay plan
prior pay rate determinant
prior step or rate
prior work schedule

Default:

(1) If prior basic pay or prior pay basis is spaces
Asterisk prior pay basis and prior basic pay.

(2) If prior duty station is spaces,
Asterisk prior duty station and prior locality adjustment.

(3) If prior grade is spaces,
Asterisk prior grade, prior step or rate, prior pay basis, and prior basic pay.

(4) If prior occupation is spaces,
Asterisk prior occupation.

(5) If prior pay plan is spaces,
Asterisk prior pay plan, prior grade, prior step or rate, prior pay basis, and prior basic pay.

(6) If prior pay rate determinant is spaces,
Asterisk prior pay rate determinant, prior pay basis and prior basic pay.

652 (LOCALITY ADJUSTMENT)

Note: Table 25 shows locality pay percentages currently authorized for each locality pay area. Prior authorized percentages are retained in CPDF internal tables. Locality pay amounts are edited against the locality pay percentages authorized as of the effective date of the action. We divide the locality adjustment amount by the basic pay amount to calculate the percentage used in these edits. We generate the locality pay area code from the duty station. The locality pay area codes are defined in The Guide to Personnel Data Standards, available on the Internet at http://www.opm.gov/feddata/guidance.htm.
